

GMRS EMERGENCY NETWORK - OAKLAND (GENOAK)

GENOAK is a neighborhood-to-neighborhood emergency 2-way radio communications network for Oakland and nearby areas, utilizing the General Mobile Radio Service (GMRS)

www.genoak.org

In the event of a large-scale emergency such as a major earthquake or wildfire, individuals and neighborhood/CERT groups in and around Oakland **may need to depend on information and assistance from other nearby communities.**

During these times, GENOAK will enable effective 2-way radio communications between neighborhood groups. The GENOAK GMRS repeater can allow neighborhood groups to connect with each other to **report on threats and incidents, provide status updates, share resources, mobilize volunteers and coordinate needed assistance**, among other tasks.

Individuals and neighborhood/CERT groups will also be able to communicate during extended power outages (Public Safety Power Shutoffs) and at other times **when phone and Internet services are unavailable.**

INTERESTED IN PARTICIPATING?

GENOAK holds a regular **on-air get-together** called a "check-in net." The purpose of this net is to allow individuals and neighborhood/CERT groups to become familiar with the use of their radio and to develop good radio communications skills.

The GENOAK check-in net takes place on the first Tuesday of each month at 19:00 (7:00pm) Pacific Time

To learn more about how to participate in the net or about being a Net Control Operator, visit www.genoak.org/check-in
